- 100% Uptime Guarantee!
- Hosted Application Service (*SaaS - Software As A Service*)
- IT Services (*Product Support*)
- Control Panel Access
- Unlimited Disk & Traffic Usage
- N+1 Data Centers
- Monitored Server Performance!

### EMAIL SERVICES (HostIt!)

---

- Hosted Exchange (*Business Class Email*)
- Enterprise Spam Filtering
- Traditional Mail (*POP Email. Limited For Special Circumstances*)
- Keep All Devices Synced
- Outlook Anywhere Access
- Share Contacts, Calendars, Notes and Tasks

### SECURE DATA BACKUPS (SecureIt!)

---

- Simple Network Setup
- Secure Data Encryption
- Private Encryption Key
- Automatic and Unattended
- Ultra Fast Backups and Restores
- Configurable Settings
- Automatic & Unattended
- Stay Within HIPAA Compliance
- 24/7 Data Monitoring & Reporting
- 30 Free Trial Available

### ENCRYPTED WEBSITE FORMS (SecureIt!)

---

- Encrypted Website Communications
- Encrypted PDF Receipts
- Configurable Settings
- PGP Encryption
- PGP Encryption Keys
- PDF or Plain Text Emails
- Encrypted PDF's
- Styled HTML Emails To User and Employee

### SECURE FILE TRANSFERS (SecureIt!)

---

- No Recipient Account Needed
- File Encryption
- Large File Transfers
- Password Protected
- Multiple Recipients
- Custom Branded Templates
- Auto File Destruction
- Statistic Reporting

## DESIGN SERVICES ( BuildIt! )

### Stand Out and Get Noticed!

Make a statement. Draw attention. Stand out in a crowded marketplace. The highest quality design makes an impact that drives results.

### Streamline Your Business

Consistency throughout your business builds trust from clients and loyalty from employees. Deliver a seamless experience of quality standards at every touch point of your business.

### Build Your Reputation

Your business is only as strong as your customer's willingness to share with others. Increase social sharing and your reputation by delivering share worthy imagery and media to stand out in today's media saturated world.

# DESIGN SERVICES ( BuildIt! )

## WEBSITE DESIGN & DEVELOPMENT

---

Web design is about both form and function. An eye-pleasing design is only the starting point. For many companies your site serves as the first introduction to your company. We know that a good design makes the most of this introduction and directs your customers to the information they need most. With proper design you will increase their engagement, drive more traffic and ultimately, strengthen your online presence.

## SEARCH ENGINE OPTIMIZATION

---

Website clicks to phone calls. That is the cycle of business today. If you are not easily found online, you simply don't exist. Our SEO services ensure your site is being found by the right people-those searching for your products and services. If you have ever wondered how your competitors always show up before you in search results, this is where we fix that.

## BRANDING & CORPORATE IDENTITY

---

A brand as a name, term, sign, symbol, design, or as a combination of them used to identify your business apart from others. Branding is not about getting your target market to choose you over the competition, but it is about getting your prospects to see you as the only one that provides a solution to their problem.

## PACKAGE DESIGN DEVELOPMENT

---

Elegant packaging is no longer used solely by a few elite companies. In today's competitive marketplace this serves as an extension of your brand experience. You are no longer selling your product - you are selling the entire experience with your product. Package design does more than look good on the shelf, it has to sell a product. Our team can deliver packaging that is both beautiful and effective for promoting a positive customer experience.

## PRINT COLLATERAL MATERIALS

---

Although today much emphasis is placed on the digital, social, and mobile recruiting landscape, print collateral materials remain an integral part of strategic and marketing campaigns. That's why we continue to create and deploy powerful, compelling collateral materials, including brochures, direct mail pieces, billboards, brochures, business cards, and flyers.

## MARKETING & ADVERTISING CAMPAIGNS

---

With multiple avenues to advertise creating a marketing strategy can be overwhelming. We simplify the process and give you a marketing roadmap you can understand. Planning a marketing campaign begins with understanding your position in the marketplace and ends with details such as the wording of an advertisement.

## BUSINESS CONSULTING

---

We will work with you to identify ways to enhance your overall business operating model and help your business make better use of existing resources. Often technology serves to make better use of existing resources waiting to be utilized from within your organization.

## CUSTOM PROGRAMMING ( BuildIt! )

### Software Built For You!

Is it possible to have software that feels like it was made just for you? We assure you it is a reality. Gone are the days of making software bend to the way you "really" do business. Custom software and web apps now fit the way you work, rather than define the way you work.

### Streamlined Applications

Eliminating redundancies and workflow bottlenecks is possible by connecting different software applications. Ask us how we can easily move information from one program to another and free up unnecessary wasted time and extra steps.

### Cloud, Desktop and Mobile

Your information can be available anytime and on any device. Maximize your team's access to your system to enable faster turnarounds, better client support, and efficient communication.

# CUSTOM PROGRAMMING (BuildIt!)

## CUSTOM SOFTWARE DEVELOPMENT

---

We help businesses from startups to enterprises create positive growth and profitability with custom software development. Learn how our collaborative approach is the best choice for your business.

## DESKTOP APPLICATIONS

---

Imagine having software that worked on your computer exactly how you always wanted. We design custom software programs that install on your computer just like you are used to and connect to your server or any data source. The difference is we work with you to create programs that are specifically built for your company and the way it works. Never again settle for software that does some of what you need and none of what you wish it would.

## WEB APPLICATIONS

---

Discover the freedom of accessing your software anywhere you have a live internet connection. Web Applications provide many options for access in a wide variety of computing environments. Access your programs via any web browser using a PC, Mac, tablet, or smartphone and remove the limits on where and when you work.

## MOBILE APPLICATIONS

---

With the increasing number of mobile devices being used today, many businesses are turning toward building mobile applications. Offering an application for your website, product, or service is a great way to market and connect with customers. Our programmers design for both Android devices and Apple products depending on your needs.

## HARDWARE INTEGRATION SERVICES

---

Old or unique hardware can often be a challenge to integrate into your network environment. We specialize in finding methods to get your entire system "talking" together and working in the most efficient manner possible.

## CUSTOM DATABASE DEVELOPMENT

---

We are committed to making your databases reliable, scalable, maintainable, and secure. With experience in many diverse industries, see why we're the right choice for your database development needs.

## SAAS PRODUCT ARCHITECTURE

---

Serve your products and solutions to the world through our SaaS Product Architecture. We provide an online platform for today's business solutions that delivers reliability, security, and multi-device compatibility.

## MODERNIZE LEGACY APPLICATIONS

---

We know that sometimes the perfect software is the same one you have always used. We can replicate the functionality of your "tried and true" software and bring it up to date in a completely new desktop application. You own that software and are free to make changes and updates at any time.

## SCALE ON DEMAND

---

We develop web and software solutions with the idea that you will grow and expand over time. You are never locked in to one way of doing things. We create programs that can flex and adapt and change over time with you and your business.

## HOSTING SERVICES ( HostIt! )

### 100% Uptime Guarantee!

Never miss an order or inquiry. Our professional business hosting delivers a guarantee of 100% uptime so you never miss out on your next deal. Customers can always get in touch and your team will have uninterrupted access to your data and application resources.

### N+1 Data Centers

Ensure your data is secure, maintained, and available with N+1 data resilience. All components have at minimum one extra backup failsafe to maintain system integrity. Your data is live online and safe, guaranteed.

### Monitored Server Performance!

We monitor your server for any peaks in traffic, spikes in resource demands, or other events that otherwise might bring your hosting environment to a standstill. On your end business continues as usual as we respond and mitigate any disruptions.

# HOSTING SERVICES ( HostIt! )

## SOLID STATE DRIVES

Our servers feature the highest quality Solid State Drives. Faster, quieter, and more physically resilient than spinning drives, they increase the performance and reliability of data transfers and reduce website response time.

## RAID PROTECTED STORAGE

Raid protected storage technologies make your data more secure by storing the same data on multiple hard disks. This allows the system to rebuild the data in case one of the hard disks fails. Another example of how we ensure your data is safe and protected.

## DISK & TRAFFIC USAGE

We believe you should never be punished for business success and increases in traffic to your site. Unlimited traffic and disk usage means your site will perform even under the most demanding traffic events.

## MULTIPLE SUBDOMAINS & DOMAIN ALIASES

Provide customer or group-specific access via custom URL's or domain aliases. Easily manage multiple web apps or content sections without purchasing multiple domain names.

## PHP-FPM (LATEST)

Useful for sites of any size, but especially busier sites, PHP-FPM optimizes the flow and processing of data in your hosting environment. Serving up data requests for even the most complex systems without an issue it delivers speed and reliability.

## MARIADB (LATEST)

One of the most popular databases in the world, MariaDB (Latest) is the open-source technology behind a wide variety of uses including websites and banking applications. It is fast, scalable, robust and easily configured for implementation in your project.

## CONTROL PANEL ACCESS

We never lock you out from access to your server. Whether you desire to observe traffic logs or setup up new database connections, you always have access to your hosting control panel.

## ADDITIONAL FEATURES

- |                            |                                     |                            |
|----------------------------|-------------------------------------|----------------------------|
| Premium Domain Spam Filter | Automatic Backup Snapshots          | SSH Access                 |
| Secure FTP Accounts        | Protected Folders                   | SQL Databases & Users      |
| DNS Record Management      | Shared & Dedicated IP               | SSL Access To All Services |
| Domain Management          | Shared & Dedicated SSL Certificates | No Setup Fees or Contracts |

**SERVER TECHNOLOGIES:**

## EMAIL SERVICES ( HostIt! )

### Sync All Your Devices!

Your data can be available on any device, at any time. Make changes on your laptop and see them almost instantly. Always be up to date with the latest changes and forget about scrambling to find your most recent documents.

### Remain Mobile, Always!

Mobile technology has advantages, but only if your email and archives can easily be accessed on the mobile platform. We design and utilize email software for mobile applications and ease of use.

### Share Your Information!

Collaborate with your team utilizing shared calendars, contacts, and reminders. Synchronize agendas and eliminate missed meetings and being "out of the loop".

# EMAIL SERVICES ( HostIt! )

## OUTLOOK ANYWHERE ACCESS

---

No longer are you confined to the desktop when you want to use Outlook. Utilize the program you rely on with the convenience of anywhere access via tablet, mobile, or other internet-connected computers.

## PREMIUM SPAM FILTER

---

Spam email is more than just an annoyance. It also exposes your network to malware, phishing scams, and viruses. Protect your users and the security of your network with one of the strongest Spam filters available.

## MICROSOFT OUTLOOK AVAILABLE

---

Utilize the full suite of features available in Microsoft Outlook. From Calendar, Meetings, Notes, Email, and Contact Manager, you have access to the tools you need to stay connected and organized.

## ACTIVESYNC

---

All your emails, calendar data, contacts, and tasks are synchronized automatically to your mobile device.

## SHARE CONTACTS AND CALENDARS

---

Build and maintain centralized resources for your entire team to draw from. Avoid the inefficiencies of isolated information and bring all users into the loop.

## SHARE NOTES AND TASKS

---

Keep everyone on the same page with information they need and "real-time" updates. See what other team members have accomplished and identify what else needs to be done.

## EMAIL ARCHIVING

---

Preserve all your email in both to/from formats. Maintain a searchable file to recover history of communication as well as timestamps and user information.

## ADDITIONAL FEATURES

---

Remain Mobile, Always!

Remote Wipe

Blackberry Support

Directory Link

Sharepoint

No Setup Fees

Public Folders

Lync

Premium IT Support

## SUPPORTED PLATFORMS

*We also support and maintain POP email accounts for use in certain situations. For additional details be sure to ask your Sales Representative*

## SECURE DATA BACKUPS ( SecureIt! )

### Never Lose Data Again!

Restore individual files or your entire system in the event of a major event. Our backup systems works in the background without slowing your work and delivers rock-solid versioning and offsite backups.

### Automatic & Unattended!

Stop worrying about when you last completed a system backup. Schedule backup frequency and determine appropriate files. Receive email reports detailing successes or warnings with every backup.

### Ultra Fast Backups & Restores!

Recovering files from a backup is fast and efficient whether you are restoring individual files or restoring your entire system. Bring your system up to date and quickly get back to work.

# SECURE DATA BACKUPS ( SecureIt! )

## SIMPLE NETWORK SETUP

Creating a comprehensive, robust and ultra-secure backup solution has never been easier. You will be able to backup single workstations or entire servers depending on your needs and requirements.

## INTELLIGENT SOFTWARE INCLUDED WITH AUTOMATIC UPGRADES

One of the best features of our software is its diversity. It is simple enough to setup for basic users yet infinitely scalable for even the most advanced user. There's no expensive hardware or additional software required and no more tape drives or laborious manual backup routines.

## AUTOMATIC & UNATTENDED

You can be assured our software is working to maintain and protect your backups even when you are away or your system undergoes large changes. Backups adapt accordingly and give you a full report upon completion each and every time.

## SECURE DATA ENCRYPTION

Our software uses either AES 128-bit, AES 256-bit, or Ultra-Secure Military-Grade Blowfish 448-bit encryption to protect your data prior to being transmitted to our secure facilities using SSL. Since a personal encryption key is chosen by you during the initial software setup, you can rest assured that your data is ultra safe and secure at all times, and only accessible by you. Without the encryption key, no one will be able to access your files, including Triple3.

## PRIVATE ENCRYPTION KEY

Rest assured that your data is secure and available to no one but your authorized users and devices. Your data is protected by the highest-level encryption protocols and only available to those you permit.

## ULTRA FAST BACKUPS & RESTORES

Our technology allows for lightning-fast backups. It will track your files and only backup the files that have changed rather than re-uploading files. It also compresses your Data up to 70% of the actual size, and splits bigger files into blocks - meaning that when changes are made, only the specific block is backed up instead of an entire file - super-efficient! Lastly, if you ever have to perform a restore, our software will utilize the same technology that gives us lightning-fast backups to restore your data quickly and get you back in business.

## ADDITIONAL FEATURES

MultiZone Protection	Self-Healing Archiving Capability	Courier Service	Premium IT Support
Bare Metal Restores	Virtual Disaster Recovery	Deduplication	No Bandwidth Caps or File Size Limits
Seeded Backups & Restores	Configurable Settings	LocalVault™	No Setup Fee's or Contracts
Servers, NAS Device, Virtual Machines, Desktops and External HD's	HIPAA Compliant	24/7 Data Monitoring and Reporting	

## SUPPORTED PLATFORMS

## ENCRYPTED WEBSITE FORMS ( SecureIt! )

### Encrypted Website Communications!

Private, secure, and without exposure to spam and malware. You can be confident your public facing web forms are protected and secure.

### Encrypted PDF Receipts!

Send encrypted receipts for sensitive transactions or privacy requirements. The receiving user will be delivered an encrypted email with the PDF as an attachment. PDF attachments can also be encrypted if needed.

### Configurable Settings!

Your level of encryption and access is always configurable. Provide the appropriate level for each and every form or and communication workflow.

# ENCRYPTED WEBSITE FORMS ( SecureIt! )

## GPG ENCRYPTION

---

Encryption processes are necessary but can be time-consuming. Our GPG Encryption uses faster encryption algorithms to speed up the encryption process. The end result is you receive the security you need without system slowdowns.

## PGP ENCRYPTION KEYS

---

Authenticate all of your data communications to ensure secure e-mail communications. You can be confident your digital data is only being viewed and accessed by approved users.

## PDF OR PLAIN TEXT EMAILS

---

Whether you are submitting text-based messages or converting them to PDF documents you can be assured your communications are encrypted with the same security options.

## ENCRYPTED PDF'S

---

Easily handle permissions for editing, printing, and sharing data in PDF documents. Maintain integrity of content and an audit trail of any changes.

## HIGHLY CONFIGURABLE SETTINGS

---

Your level of encryption and customized options are always configurable. Provide the appropriate level for each and every form or user access.

## HTML EMAILS TO USERS AND EMPLOYEES

---

The beauty of HTML email layouts is useful for newsletters and other branding during your business communications. Maintain encryption as appropriate while utilizing this highly effective email format.

## SUPPORTED PLATFORMS

iPhone

ANDROID

## SECURE FILE TRANSFERS ( SecureIt! )

### Authentication Options

Require passwords to verify end user credentials and authenticate file access. Or turn password requirements off for non-sensitive data. Either way you maintain control over who has access, how long your files are available, and how often they can be retrieved.

### Secure Communications!

Deliver files to your customers or team members with secure file transfers. Helps you stay compliant by automatically protecting your data, which is encrypted at all times--during the transfer, and while stored waiting for the recipient to access them. Provide peace of mind for internet communications with an easy to use web-based platform.

### Strict protocols

Provides file access, file transfers, and file management via secure communication protocols. Private and secure messaging prevents tampering and forgery.

# SECURE FILE TRANSFERS ( SecureIt! )

## NO RECIPIENT ACCOUNT NEEDED

---

Send files to any user without them being required to have login credentials. Maintain easy access and delivery via user-friendly software.

## NO SOFTWARE INSTALL NEEDED

---

Send files to any user without you or them being required to install any software programs. Maintain easy access and delivery via user-friendly web based software.

## FILE ENCRYPTION

---

Your files are secure by the highest level file encryption. No one will be able to view your files except for the intended recipient, not even us at Triple3. Safe and Secure!

## LARGE FILE TRANSFERS

---

Send files up to 3GB in size without restriction. (Many email programs allow only 25MB.) Prevent corruption of downloads and ensure data integrity and keep your email free of space-wasting files.

## PASSWORD PROTECTED

---

You can require passwords as needed for files that must remain secure. Easily turn off when not necessary. Either way your data is encrypted and safely stored and delivered.

## MULTIPLE RECIPIENTS

---

Users can easily select multiple recipients to receive file transfers. Notification can be turned on or off, and is provided when your files are sent, delivered, and destroyed.

## CUSTOM BRANDED TEMPLATES

---

Send users emails branded with your logo and information. Reassure users they are accessing the right content and deliver a seamless user experience.

## AUTO FILE DESTRUCTION

---

Files are available for 7 days, or until they have been downloaded. You determine whether files are automatically destroyed upon being downloaded, or if they remain available for the full 7 days.

## STATISTIC REPORTING

---

Reports let you know who has accessed your files and when. Confirm your files have been received and settle any disputes that your items were never received.
